Change record

Date	26/11/20	Author		Gillian Arthur			
		Updates					
				now assisting with cleaning contact areas – door handles			
			now being sanitised, desk area's cleaned/ wiped – ongoing COVID Signage displayed through out the building				
			Regular ei lo.	mails issued to staff to remind them of what they need to			
			ace cove ouilding.	rings/masks must now be worn when entering any NLC			
		5. C	Contacts j	for a deep clean if there is an outbreak recorded.			

Guidance notes on completion

Delete these notes once you have completed your assessment

- 1. This is a generic risk assessment. Statements contained within are for illustrative purposes only and must be amended as appropriate to reflect the particular circumstances of the work activity being carried out.
- 2. This risk assessment must be amended by a competent person. A competent person has the combination of training, skills, experience and knowledge, and the ability to apply them, to perform a task safely.
- 3. To make the generic risk assessment specific, the risk assessor must reflect the reality of the circumstances of the work activity being assessed.
- 4. The assessor should identify which, if any, controls listed in the "Current controls" column are already in place. They should also identify any additional controls they already have in place. Only risk control measures currently in place and operating as planned should be listed in this column.
- 5. The assessor should estimate the risk with all of the identified current risk control measures in place. The assessor should apply the risk matrix, considering the likelihood of exposure to the identified hazard, and the likely consequences of exposure. The risk is determined by multiplying the likelihood by the consequence:
 - Risk = Likelihood x Consequence
- 6. The risk assessor should then consider whether more could reasonably be done to further reduce risk. This may be implementing some of the controls listed in the "Current controls" column, or it may be implementing other controls that have been identified. These additional controls should be listed in the "Further controls required" column. It may be that no further actions can reasonably be implemented. In this case the risk assessment is complete.
- 7. Where further controls can reasonably be implemented, the assessor should consider the residual risk if all identified further controls are implemented. The assessor should consider whether the further controls act to reduce the likelihood of exposure to the hazard, the likely consequences of exposure to the hazard, or both. The residual risk is calculated in the same way.
- 8. An action plan template for these further controls is provided. This should be completed detailing action required, the person(s) responsible for carrying out the action and the timescale for completion. The action plan should be monitored on a regular basis and updated with dates actions are completed.

Activity Details
General workplace risk assessment in relation to coronavirus management

Hazard	Who could be harmed	Current Controls	Risk Rating LxS=R	Further Controls Required	Residual Risk
Exposure to coronavirus	Council employee Other visitors	Access and egress points are controlled and reduced to a minimum to make risk control measures easier to implement and monitor Restrict access to the building by visitors and maintenance staff. If not possible, then confine visitors to strictly defined areas and avoid unnecessary movements around the building		Doors can only be accessed by FOB Building closed to the public March 2020	
		Install hand sanitisation points clearly at all entrance and exit points. Staff to		Hand sanitiser available at entrance and exit and also around the three floors in the	

Hazard	Who could be harmed	Current Controls	Risk Rating LxS=R	Further Controls Required	Residual Risk
		politely direct all staff and visitors to use them when entering and leaving the building.		building. No visitors in the building to direct.	
		 Consider the replacement of traditional washroom dispensers such as toilet roll holders, hand towels and warm air dryers with nontouch alternatives that reduce contact frequency. Minimise user contact points 		Most toilets in building has warm hand dryers	
		 by ensuring that all sensor operated doors are operational. Consider increasing cleaning 		Doors can only be accessed by FOB	
		frequency such that cleaning operatives are able to provide on site cover at all times that the building is occupied.		Staff are currently undertaking cleaning tasks, however cleaning operatives attending each night	
		Ensure all hand contact points are cleaned throughout the day including, door furniture, handrails, flush plates, taps, dispensers, etc.		Cleaners are assisting with this.	
		Provide virucidal sprays or other suitable cleaning materials throughout the building. Make this available to staff so that they can continuously self-clean their work areas throughout the day. Hand sanitiser in pump		Cleaning materials provided on all floors	
		action/low contact containers should be available in every work area and at main travel routes through a building.			

Hazard	Who could be harmed	Current Controls	Risk Rating LxS=R	Further Controls Required	Residual Risk
		 Ensure cleaning operatives are using appropriate certificated virucidal cleaners and wipes for daily preventative cleaning with clear usage methodology. Where practical remove 		Cleaning operatives only use approved cleaning materials Removal of blinds not practical.	
		curtains and blinds to minimise the areas where germs can be difficult or time consuming to remove. Keep blinds opened and locked off if they cannot be removed.		Tremoval of billius not practical.	
		 Remove rugs and mats where safe to do so to make cleaning and disinfection of floors easier for cleaning operatives. 		No rugs or mats as they are trip hazard.	
		 Consider introducing a daily steam cleaning procedure for washroom cleaning. Display advisory signage 		Cleaners now assisting with cleaning desk areas and handles with anti- bac cleaner	
		throughout the building, especially at entrances and exits and were people congregate. Refresh and update regularly in line with current Health Protection Scotland advice.		Signage throughout the building. Continue to ensure staff aware of updates	
		Arrange distribution of information on how to hand wash effectively and for the correct duration. Make NHS handwashing videos available on all devices and public area screens.		Emails distributed as and when required. Signs displayed to show workers how to wash hands correctly.	
		Encourage building users to work remotely therefore avoiding the need to use			

Hazard	Who could be harmed	Current Controls	Risk Rating LxS=R	Further Controls Required	Residual Risk
		 public transport and reducing the risk of community transmission. Discourage staff from wearing neck ties and 		Workers/admin now have laptops to allow to home work.	
		scarves. These are often not washed frequently and can easily collect and transmit germs when working in close proximity to colleagues.		Emailed out 01/04/20	
		Encourage building users to minimise business related travel and use video conferencing as an alternative method of maintaining contact with colleagues, suppliers and customers.		All meetings are being held with tele conferencing	
		 Discourage hand shaking and general close personal greetings Promote Health Protection Scotland guidance on action to be taken by building users if they have, or suspect they 		Emailed staff in relation Emailed out to staff	
		 have, symptoms associated with coronavirus. Agree at what point buildings will be closed to some, or all, building users depending on suspected or confirmed coronavirus cases. Review this in line with current 		Building closed to public – contact number provided on notification	
		 guidance. Identify, and agree terms with, an alternative contract provider to deliver specialist deep cleaning services in the case of confirmed outbreaks 		N/A	

Hazard	Who could be harmed	Current Controls	Risk Rating LxS=R	Further Controls Required	Residual Risk
		 and the current cleaning arrangements being insufficient. Agree the deep cleaning methodology that will be used in the event of confirmed outbreaks. This should be based on a 2 stage process of clean and disinfect using products that have been independently certified against coronavirus. 		N/A	
Number of workers/ admin within the building	May cause spread of virus to increase	Number of workers and admin staff has significantly reduced. Admin staff reduced to max 2. Rotas are in place for workers. Staff now working from home have been provide with laptop and works mobile.		This will be monitored ongoing	

Summary of Action Required

Action Required	Responsible Person	Timescale for Completion	Date Completed
Cleaner's now assisting with cleaning key touch points – door handles / desks etc	Gillian Arthur	Ongoing	

The contents of this risk assessment are an accurate reflection of the activities being undertaken and appropriate control measures to be implemented or maintained to ensure the activity can be undertaken whilst protecting the health safety and welfare of employees and anyone else who could be affected. The content of the risk assessment will be made known to employees, controls implemented and monitored and a review carried out either annually or when a change to circumstances dictates.
